I Am Developer

@iamdeveloper

Following

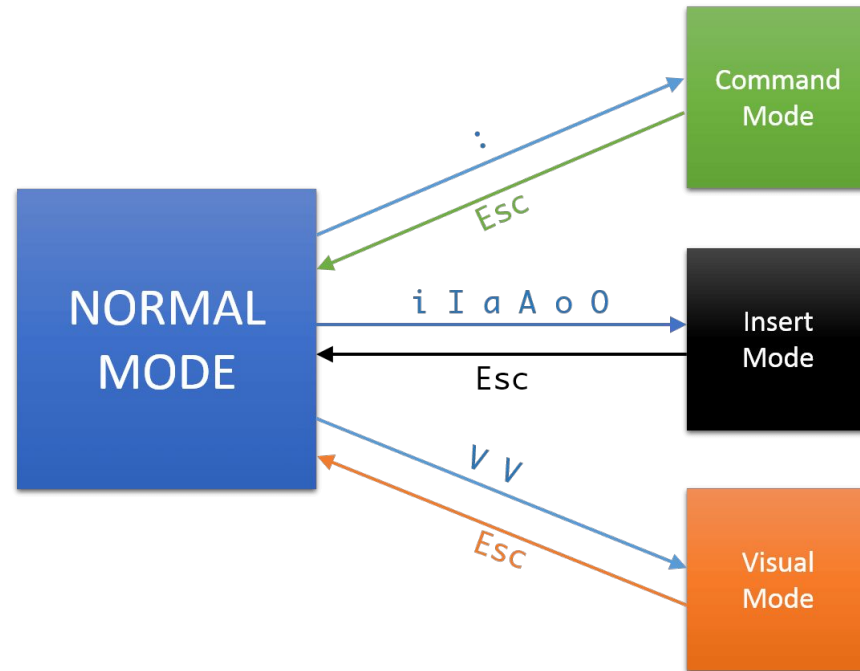

I've been using Vim for about 2 years now, mostly because I can't figure out how to exit it.

# What is Vim

- Modal text editor
- Focuses on editing rather than writing
- Available on Linux, Windows and Mac
- Lightweight and fast
- Keyboard-based, mouse-free interface

# Vim's modes

# Command language

[number] [command] [text object or motion]

**c**hange      **a**w = a word      **h/j/k/l** = left/down/up/right

**d**elete      **i**w = inner word      **f/F** {char} = find {char}

**y**ank      **a**t = a tag      **t/T** {char} = til {char}

**i**t = inner tag      **w/W** = go to next word

**b/B** = go back a word

# File navigation

```
public static void calculate() {  
    try{  
        IMathParser parser = MathParserFactory.create();  
        parser.setExpression("X+Y+SIN(X/Y)+MYVARIABLE");  
        parser.setX(4);  
        parser.setY(5);  
        parser.setVariable("MYVARIABLE", 6);  
        System.out.println(parser.getValue());  
    } catch (Exception ex) {  
        System.out.println(ex.getMessage());  
    }  
}  
  
public static void calculateLoop() {  
    try{  
        IMathParser parser = MathParserFactory.create();  
        parser.setExpression("X+Y+SIN(X/Y)+MYVARIABLE");  
        parser.setX(4);  
        parser.setY(5);  
        parser.setVariable("MYVARIABLE", 6);  
        parser.setOptimizationOn(true);  
        for(int i=0; i<MAX; i++){  
            parser.setX(f(i));  
            System.out.println(parser.getValue());  
        }  
    } catch (Exception ex) {  
        System.out.println(ex.getMessage());  
    }  
}
```
